

Preparation sheet for Test 3

Problems on this Test will be based on the homework problems listed below.

Note 1: You should check the original homework assignment for Hints or Notes for any of the problems listed below with an asterisk (e.g., 2*). Some problems have more than one Hint or Note, so make sure to *find and use all of them*.

Note 2: If an even-numbered problem does not have an answer listed on the homework webpage, then it must be a WebAssign problem, and the answer should be found there.

Note 3: A problem on the Test may combine concepts of more than one problems listed on this sheet, or it may use only part of the solution of a given homework problem.

Note 4: Groups of problems from the same section that may pertain to different test problems are separated by a space.

When preparing for the Test, it will be beneficial for your performance if you **redo** the problems listed below, and also review the related examples in the notes and in the book. Please **note**: It will **not help you much** if you simply browse those problems **without actually doing them**.

On this Test, use of calculators will be allowed.

You may also prepare and use one double-sided sheet with formulae.

1. Sec. 15.2: # 20*, 56*, 58*, 18*, 61, 63, 64*. (The WA problem most similar to # 64 is # 7 on the WA list.)
2. Sec. 15.3: ## 39, 41. Do not evaluate the integrals; just convert to polar coordinates. See Selected answers below.
3. Sec. 15.6: ## 20*, 22, 27(a), 31, 35. Do not evaluate the integrals; just set them up. See Selected answers below.
4. Sec. 15.7: ## 5, 6, 12, 18*, 23, 24, 25, 26*, 31*. Do not evaluate the integrals; just set them up. See Selected answers below.
5. Sec. 15.8: ## 5, 12*, 13, 17*, 20, 21(a), 26, 27, 28, 29, 32, 43. Do not evaluate the integrals; just set them up. See Selected answers below.
6. Sec. 15.9: 11, 7*, 25, 26;
and also # 55 in Review Exercises at the end of Chap. 15 (p. 1120).

See Selected answers and Important note on next page

Selected answers

$$\# 15.3.39: \int_0^{\pi/2} \int_0^2 \exp[-r^2] r \, dr \, d\theta;$$

$$\# 15.3.41: \int_0^{\pi/6} \int_0^1 r^3 \cos \theta \sin^2 \theta \, r \, dr \, d\theta.$$

$$\# 15.6.20: \int_0^1 \int_0^{1-x} \int_{x+y}^1 xz \, dz \, dy \, dx;$$

$$\# 15.6.22: \int_0^3 \int_0^{y/3} \int_0^{\sqrt{9-y^2}} z \, dz \, dx \, dy.$$

$$\# 15.7.24: \int_0^{2\pi} \int_0^1 \int_{-\sqrt{4-r^2}}^{\sqrt{4-r^2}} r \, dz \, dr \, d\theta;$$

$$\# 15.7.31: \int_0^{2\pi} \int_0^2 \int_r^2 r^2 \cos \theta \, z \, dz \, dr \, d\theta.$$

$$\# 15.8.29: \int_0^{2\pi} \int_{\pi/6}^{\pi/3} \int_0^a \rho^2 \sin \phi \, d\rho \, d\phi \, d\theta;$$

$$\# 15.8.26: \int_0^{\pi} \int_0^{\pi} \int_0^3 \rho^4 \sin^3 \phi \sin^2 \theta \, d\rho \, d\phi \, d\theta;$$

$$\# 15.8.28: \int_0^{2\pi} \int_0^{\pi/4} \int_1^2 \rho^3 \sin \phi \, d\rho \, d\phi \, d\theta;$$

$$\# 15.8.27: \int_0^{\pi/2} \int_0^{\pi/2} \int_0^1 \rho^3 \sin \phi \cos \theta \, e^{\rho^2} \, d\rho \, d\phi \, d\theta;$$

$$\# 15.8.32: \int_0^{2\pi} \int_{\pi/4}^{\pi/2} \int_0^2 \rho^2 \sin \phi \, d\rho \, d\phi \, d\theta;$$

$$\# 15.8.43: \int_0^{\pi/2} \int_0^{\pi/4} \int_0^{\sqrt{2}} \rho^4 \sin^3 \phi \sin \theta \cos \theta \, d\rho \, d\phi \, d\theta.$$

IMPORTANT NOTE

When working on all of these problems, you must practice sketching the solids and the regions of integration. This is especially critical for problems in Secs. 15.6, 7, 8, where you will have to sketch a 3D object. Remember: People are not born with a 3D intuition; so the only way to develop it is by much practice. It will be **critically important for your performance on this test** to be able to sketch a 3D solid in a short amount of time.

To help you verify your sketches, please refer to the Mathematica notebook which is posted next to this preparation sheet.
